Why Buy Your Parts from Reynolds Farm Equipment?

Since 1955, Reynolds Farm Equipment has worked alongside farmers through countless planting and harvest seasons, building experience that only comes from decades in the field and at the parts counter. Our team understands the pressures of narrow windows, changing conditions, and equipment that has to perform when timing matters most.

From older machines to today's advanced ag equipment, we use that experience to help farmers identify the right parts quickly, avoid downtime, and keep their operations moving. Built on generations of trust and real-world knowledge, Reynolds remains committed to our farmers with the parts, practical expertise, and service they can count on.

What is the difference between sweeps?

	Conventional	Tru-Width	High Productivity
Longest Wear Life	Good	Better	Best
Shape Retention	Good	Better	Best
Lower Draft	Good	Better	Best
Reduces Ridging		Better	Best
Sticky Wet Soil Conditions		Best	Better
Shallow Working Depths (<2")	Best	Best	Better
High Speed Capabilities (7–10mph)			X
Easy Perma-Loc™ Adapter		X	X
Bolt-on Adapter	X	X	X
Xtra-Life Coating	X	X	
Plus Coating		X	X

John Deere PLUS Sweeps

The long wear life PLUS sweeps are available in both the Tru-Width™ and High Productivity version and attach to the John Deere Perma-Loc™ attaching system. This expands the offering of these longer wear life sweeps as the previous version was only available as High Productivity. A Tungsten Carbide blend is robotically applied to the nose, underneath the wing and the neck of the PLUS sweep. Internal testing has shown the newest version lasts 2 to 3 times longer than an uncoated sweep. This helps growers spend less time changing worn sweeps and more time preparing the seedbed to hit the critical planting window. By holding their original shape throughout the tillage season, PLUS sweeps help to ensure a consistent, quality tillage job, from the first acre to the last.

NUMBER	DESCRIPTION	SALE PRICE
Tru-Width™

John Deere High Productivity Sweeps

High Productivity sweeps are designed for top performance at 7-10 mph. Their low wing profile reduces draft, leaves a level finish, and cuts through residue. Available in John Deere and Essentials options.

NUMBER	DESCRIPTION	SALE PRICE
N331099	7" High Productivity Low Perma-Loc™	$13.54
JXN331099	7" Perma-Loc Essentials	$10.36
N331100	9" High Productivity Low Perma-Loc™	$15.43
JXN331100	9" Perma-Loc Essentials	$11.80
N331101	10" High Productivity Low Perma-Loc™	$16.45
JXN331101	10" Perma-Loc Essentials	$12.57

PRICES VALID THROUGH 01/31/27

John Deere Tru-Width™ Sweeps

Tru-Width sweeps maintain cutting width throughout their wear life. Clipped wings minimize soil side throw, while the wraparound design supports even draft and holding power. John Deere and Essentials options available.

NUMBER	DESCRIPTION	SALE PRICE
N238333	7" Tru-Width™ Medium Perma-Loc™	$13.40
JXN238333	7" Perma-Loc Essentials	$10.25
N238334	9" Tru-Width™ Medium Perma-Loc™	$15.34
JXN238334	9" Perma-Loc Essentials	$11.73

KUHN Tillage Rebuild Kits

These complete rebuild kits are engineered to restore KUHN 8000-Series, 8005-Series, and 8010-Series tillage tools to peak field performance. Each kit includes the primary wear components matched to the machine's specific working width, making it easy to refresh an entire unit at once rather than sourcing individual parts. Designed for operators seeking consistent cutting quality, simplified ordering, and long-term durability, these kits deliver a comprehensive, like-new rebuild across the full working width of your KUHN tillage tool.

BULK OIL AVAILABLE

DELIVERED RIGHT TO YOUR FARM

JOHN DEERE HY-GARD, PLUS-50 II SAE 15W-40, DEF & MORE

Why John Deere Plus-50™ II?

John Deere Plus-50™ II is engineered for severe off-road conditions, exceeding API CK-4 standards to deliver superior wear protection, cleaner engines, and longer oil life in both new Tier 4 and older equipment. Designed specifically for the way ag and construction equipment works, it helps reduce downtime.

- **Supports extended drain intervals up to 500 hours** when used with John Deere filters
- Proven in high-load, high-temperature dyno testing to **reduce piston deposits and wear**
- Low-ash formulation **protects Tier 4 emissions systems and DPF life**
- **Backward compatible across mixed fleets**, simplifying bulk oil inventory

WHEN WE DELIVER YOUR BULK OIL, WE CAN ALSO BRING SHOP SUPPLIES AND OTHER PARTS YOU NEED!

Confidence. Value. Choice.

Every planting decision matters. John Deere offers three opener blade choices: Essentials by John Deere puts seeds in the soil without putting a big dent in your budget. John Deere Tru-Vee improves bearing reliability and trenching consistency. Tru-Vee Premium handles the toughest conditions with greater durability, precision, and seed-trench performance. Explore them all to find the right choice for your operation.

Essentials by John Deere
Opener Blade | JXAA65248
An economical option that's ideal for smaller planting jobs.

John Deere Tru-Vee™
Opener Blade | AA105716
The all-around performer that delivers good results for most operations.

John Deere Tru-Vee™ Premium Opener Blade | AA110173

John Deere's most precise blade yet for meticulous consistency, performance, and durability.

Three Zones of Hardness

The John Deere Premium Opener Blade has three zones of hardness for the performance and longevity you need.

MAXIMUM WEAR RESISTANCE	
55–58 HRC	The harder outer zone stays sharper longer.
INCREASED DURABILITY	
50–55 HRC	The softer inner zone resists cracking.
INCREASED FLEXIBILITY	
49–50 HRC	Middle zone balances hardness and flexibility.

John Deere Tru-Vee™ Premium hub design enables increased durability and precision.

- Machined, cast steel hub for more precise fit-up of hub, bearing, and blade, for improved blade runout
- 8 mm rivets, with one additional rivet for added strength
- Redesigned dust cap to improve retention and prevent debris from reaching the bearing

John Deere Gauge Wheel Arm Kit

Consistent seed depth is one of the main factors influencing uniform emergence. Worn out gauge wheel arm components can impact the operation of the gauge wheel leading to less consistent seed depth and, as a result, non-uniform emergence.

Advantages of the kit:

- Designed for top performance at 7–10 mph
- Low wing profile creates less draft, leaves a level finish
- Sharp edge effortlessly cuts through residue

Compatibility: MaxEmerge™ XP, MaxEmerge™ 5, MaxEmerge™ 5E, and ExactEmerge™

NUMBER	DESCRIPTION	SALE PRICE
AA103998	Gauge Wheel Arm Kit	$79.96

PRICES VALID THROUGH 01/31/27

Yetter Twister™ Closing Wheel & Cast Closing Wheel Row Kit

KK79552	Load Sense Orange Grip, 1.3 cm (1/2 inch) and 1.9 cm (3/4 inch) Line	$39.10

PRICES VALID THROUGH 01/31/27

New color coded aluminum hose handles make it easy to match up the hydraulic hoses on your implement with the correct function on the tractor. They also feature anti-slip design to make it easier to grip the hose and connect/disconnect from the back of the tractor. The color coded parts are laser engraved with the John Deere logo and the extend and retract icons to ensure proper matching to the correct function.

AA92875	Vibrational Strip	$16.39
AA94227	BrushBelt™ Gearbox	$188.65
AA98668	Meter Housing	$259.03

BrushBelt™ Tech Tip:

To prevent a BrushBelt™ malfunction, do not apply fertilizer directly in the seed furrow near the front of the BrushBelt™. To dry the BrushBelts™ before planting in wet conditions, perform a meter runoff. (See the SeedStar™ Application Help for the Runoff procedure.) Periodically clean the seed sensor area inside the BrushBelt™. Dusty conditions or heavily treated seeds cause an excessive buildup of dust and seed treatment inside the BrushBelt™, which blocks the seed sensor. When the seed sensor becomes blocked, false low population counts, or false low limit warnings appear.

Double Eliminator Tech Tip:

Degraded meter performance, like multiple seed placement, is an indicator of possible inner or outer double eliminator wear. Check the inner and outer double eliminators (A) for wear. Check the inner and outer tines for uniform length and diameter. If the length of the outer double eliminator measures less than 8mm from the base Tine or Brush to the tip and the meter performance is degraded, replace it. If the diameters of inner adjustable double eliminator Tines are worn to less than 1/2 the original diameter and the meter performance is degraded, replace it.

Dust Seed Lubricant

Dust is a patented, 100% soy-protein and lecithin seed lubricant that replaces graphite and talc to deliver cleaner, safer, low-wear planting. It improves seed flow, reduces bridging, and provides consistent meter performance without the mess or inhalation risk of traditional lubricants. Field-proven on more than 7 million acres and 20+ crop types, Dust works with John Deere CCS and box planters, Kinze, Case IH, Precision meters, air seeders, and other systems. It's biodegradable, USDA BioPreferred certified, and available in pouches, jugs, and case quantities to fit any operation.

NUMBER	DESCRIPTION	SALE PRICE
100014000	14 lb pail	$110.50

SPRAY NOZZLE SELECTION GUIDE

Spray quality will vary with pressure. For details, see nozzle-specific spray quality charts. Always comply with the product label recommendations or latest manufacturer advice on application on spray quality.
When using the 3D and PWM at less than 30 Hz you must install the nozzles facing the same direction. ** Use as indicated on approved label.

High Flow (HF)	Straight Stream Ceramic (SSC)	Ultra Low-Drift (ULD)	3D	Low-Drift Max (LDM)	Low-Drift Twin (LDT)	Ultra Low-Drift Max (ULDM)	GuardianAIR™ Twin (GAT)

Not sure which spray nozzle is right for you?

Our sprayer nozzle overview video explains the most common nozzle types such as flat fan, air induction, ULD, twin fan, and others so you can choose the right droplet size and pattern for every application. It also covers color coding, the GPM flow rate formula for sizing tips, and essential maintenance tips like cleaning filters, replacing O-rings, and using tools such as the SpotOn Nozzle Cleaning Kit and Sprayer Calibrator to ensure accurate and consistent application.

Scan this QR code to watch our nozzle selection video and find the sprayer tip that best fits your equipment and application needs.

SPRAY NOZZLES *ALL BRAND COMPATIBILITY*

DRIFT CONTROL NOZZLES

Ultra-low drift Max

Post-Emerge Systemic Herbicides

- 130° spray angle allows lower boom heights to reduce drift and to prevent pattern collapse when using drift reduction adjuvants
- Air-induction droplets to reduce drift
- Delivers Extremely Coarse and Ultra Coarse droplets for 90–95% drift reduction compared to standard flat fan nozzle
- ExactApply™ compatible with AutoSelect A/B, and conventional spraying

Low-drift Max

Post-Emerge Systemic Applications

- 120° wide and 60° thick pattern provides optimum coverage while maintaining overlap at low boom heights
- Dual pre-orifice nozzle reduces drift with Coarse, Very Coarse and Extremely Coarse droplets
- ExactApply™ compatible with 15-Hz & 30-Hz PWM, AutoSelect A/B, and conventional spraying
- Industry exclusive from John Deere

Ultra-low-drift

Pre- and Post-Emerge Systemic Herbicides

- 120° wide and 60° thick pattern provides optimum coverage while maintaining overlap at low boom heights
- Dual pre-orifice nozzle reduces drift with Coarse, Very Coarse and Extremely Coarse droplets
- ExactApply™ compatible with 15-Hz & 30-Hz PWM, AutoSelect A/B, and conventional spraying
- Industry exclusive from John Deere

COVERAGE NOZZLES

3D

All-Purpose Coverage Nozzle

- Up to 10% increase in weed control over conventional flat fans
- 50–75% less drift compared to flat fan nozzles
- Tight, inclined spray pattern is designed to be installed alternating forward and backward to provide 3-dimensional coverage on hard-to-hit targets
- High-velocity droplets provide excellent canopy penetrations
- ExactApply™ compatible with 30-Hz PWM, AutoSelect A/B and conventional spraying

GuardianAIR™ Twin

Post-Emerge Plant Health, Complex Canopies, and Contact Herbicides

- High-coverage forward- & rear-facing fans penetrate dense canopies
- Air-induced droplets for high-coverage applications where on-target delivery is important
- Perfect for low crops with complex canopies such as small grains and soybeans
- ExactApply™ compatible with AutoSelect A/B & conventional spraying

High Flow

Pre- and Post-Emerge Fertilizer

- Tapered wide-angle fan style promotes uniform nutrient application
- 140° pattern allows low boom height, minimizing corrosive effects on equipment
- Large droplets reduce drift compared to flood or deflect nozzles
- ExactApply™ compatible with 15-Hz & 30-Hz PWM, AutoSelect A/B and conventional spraying

Straight Stream Ceramic

Pre- and Post-Emerge Fertilizer

- Six-stream pattern minimizes foliar contact and ensures uniform coverage
- Ceramic metering orifice provides wear resistance when spraying corrosive fertilizers
- Stable streams reduce atomization and prevents leaf burn, making it ideal for top dress use
- ExactApply™ compatible with 15-Hz & 30-Hz PWM, AutoSelect A/B and conventional spraying

Express End Caps, Flush Valves and Flange Adapters

Express Nozzle Body End Caps improve system hygiene by removing the dead zone on the end of the boom pipes,reducing air and residue buildup.

- Allows air to escape through the nozzle body, reducing turn-off/turn-on times by up to 85%
- Removable end plug allows easy access for boom cleanout

Express Flush Valves allow quick flushes of the entire boom section with a turn of a handle and no tools required to open.

- Reduces flush time by 5 seconds per valve compared to standard Express End Caps alone
- Compact design limits the length it extends beyond the last nozzle body to fit most booms

Flange Adapters enable the use of Express Nozzle Body End Caps on 4-Series Sprayer models R4023, R4030, R4038, and R4045.

NUMBER	DESCRIPTION	SALE PRICE

Reynolds Boom Savers & Lift Kit Airbag Shields

Boom Savers protect your booms and fence row nozzles from accidental damage.

- Compatible with any John Deere aluminum booms
- Made of stainless steel & sold as pair

Lift Kit Airbag Shields protect your lift kit airbags from damage from corn during applications.

- Standard and Ultra-high lift kit options available
- Made of stainless steel & sold as set

NUMBER	DESCRIPTION	PRICE
BSR	Boom Saver	$260.24
LFAS	Large Frame Lift Kit Airbag Shield	$1,869.44

Solution System Cleaning

Flowmeters are a critical part of the sprayer and require regular cleaning. Flowmeters that are not maintained and cleaned at regular intervals can give erratic readings, affecting the application rate.

To avoid damage to flowmeters and prevent possible chemical application rate issues:

- Flush the solution system daily as described in Operator's Manual with clean water.
- Remove flowmeters as required and clean the turbine and bearing area with TY26101 John Deere Brake and Parts Cleaner.
- Properly clean and winterize solution system when preparing machine for storage. (See the Storage section of the Operator's Manual for procedure.)

NUMBER	DESCRIPTION	APPLICATION	SALE PRICE
AN305056	Flowmeter Insert	4700, 4710, 4720, 4920, 4730, 4830, 4930, 4940 , R4023-R4060, 408R–412R, 612R–616R	$415.55

SAFETY live with it

BALERS

NETWRAP ENDS 12/31/26

John Deere Edge to Edge Netwrap

With more footage per roll, now you can make 10–15% more bales with each roll of net—for more baler productivity and less downtime. This net is lighter and easier to handle, and priced right to reduce your cost per bale. It continues to give the same great bale coverage over the entire width of the bale, protecting the crop as well as helping to maintain the bale's shape, making handling and storage much easier. Now that's delivering the trouble-free baling you have come to know and expect from John Deere Netwrap.

NUMBER	DESCRIPTION	SALE PRICE
NW48	48" Edge to Edge	$399.00
NW64	64" Edge to Edge	$399.00

PRICE & $34 MAIL-IN REBATE END 12/31/26
Invoice before 12/31/26 to qualify for rebate.

John Deere CoverEdge Netwrap

John Deere CoverEdge goes right over the edge of the bale and snaps into place for better protection. With the elimination of shoulders, bales are perfectly shaped for better handling, transport, and storage. John Deere CoverEdge covers 15% more surface area of the round bale and protects the edges of the bale to help prevent rainwater penetration and moisture collection within the bale. It also improves the weatherability of the package. No loose "fluff" to pick up the moisture from rainfall. With John Deere CoverEdge, you can produce high-quality silage bales when wrapped with stretch film because the bale surface is smooth, eliminating air pockets in the bale.

NUMBER	DESCRIPTION	SALE PRICE
NW51	51" CoverEdge	$399.00
NW67	67" CoverEdge	$399.00

GREEN-GARD™ Hay Preservative

John Deere GREEN-GARD Hay Preservative is a buffered, propionic acid preservative that helps retain the freshness, color, and quality of the hay by stopping mold growth, heating, and spoilage.

- Bale when you're ready at moisture up to 30%
- Non-corrosive buffered formula won't harm expensive baling equipment, the user, or livestock
- Treated hay is greener, higher in feed value, and can be stored for years while looking and feeding as well as when it was baled

NUMBER	DESCRIPTION	SALE PRICE
AFH216669	Hay Preservative, Green-Gard™, 120 lbs (13 Gallon) Mini Drum	**$259.21**
AFH216670	Hay Preservative, Green-Gard™, 450 lbs (50 Gallon) Drum	**$776.53**

Advanced Hay, Straw, and Silage Tester

This advanced Hay, Straw, and Silage Tester is the most efficient probe on the market. The 20" stainless steel probe and tip provides accuracy, versatility, and durability. The SW007305 will measure push force to determine whether it's a high- or low-density bale, then adjusts the moisture result for more precise accuracy.

Features:

- Measures 8–72% moisture content
- Temperature range 32–185° F (0–85° C)
- Automatic Density Compensation
- Choice of hay or straw bales, separate mode for silage
- Memory can store results up to 64 bales with a total of 1,000 savable moisture and temperature readings
- Continuous reading as you probe bale

NUMBER	DESCRIPTION	SALE PRICE
SW007305	Advanced Hay, Straw, and Silage Moisture Tester	$342.81

AFTERMARKET TRACKS

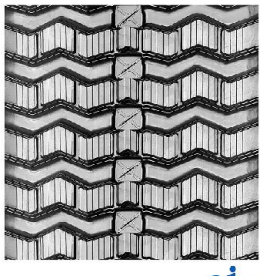

Rubber Tracks for Your Working Conditions

Choose replacement rubber tracks to match your machine and working conditions. Block tread is suited to rugged rock and dirt applications. Multi-bar tread provides broad ground contact for a smoother ride and reduced surface disturbance, while zig-zag tread is designed for traction in sand, clay, and heavy dirt. Track width, pitch, and link count vary by application—contact your Reynolds parts team to confirm the correct fit.

John Deere Grease

John Deere grease is precisely formulated to meet the demanding lubrication needs for tough off-road and on-road conditions. Choosing the right high-quality John Deere grease could show you cost savings, longer equipment life, reduced down time, and lower equipment operational cost.

BEST CHOICE: Multi-Purpose Severe-Duty (SD) Polyurea Grease and Extreme-Duty (ED) Synthetic Grease.

John Deere's best multi-purpose grease is ideal for use in high-temperature and extreme pressure applications. Best if used for U-joints, wheel bearings, and other grease points requiring severe-duty applications.

JOHN DEERE PARTS WARRANTY

GENUINE PARTS. LONGER COVERAGE.

ELIGIBLE NEW JOHN DEERE OE PARTS
24 MONTHS OR 4,000 HOURS*

THE RIGHT PARTS. THE RIGHT SUPPORT.

Your Reynolds parts team can help identify the right part for your machine and explain applicable warranty coverage and installation options. Coverage for eligible new OE parts begins on the purchase date.

ASK YOUR LOCAL REYNOLDS PARTS TEAM.

*24 months or 4,000 machine hours, whichever comes first, with unlimited hours during the first 12 months. Eligible dealer-installed parts include parts and eligible dealer labor during the first 12 months, followed by parts-only coverage during months 13-24. Parts installed by customers or other service providers receive parts-only coverage. Applies to eligible new John Deere OE service and repair parts purchased in the U.S. or Canada on or after November 1, 2026, from the purchase date. Coverage varies by product group and is subject to the applicable John Deere Parts Warranty Statement, terms and exclusions. Reman and Essentials by John Deere parts have separate warranty terms; this new OE coverage does not apply to them.

READY FOR THE SEASON

Parts, service, and support from your local Reynolds team.
